## MAGNETIC DRILLING SYSTEMS

### NEW PRODUCT!

### E100FRPLUS

FEATURING the brand new UNI 4 motor, the new **E100FRPLUS** replaces the UNITAP drilling and tapping machine. In addition to cutting screw threads up to 30mm diameter, it is capable of drilling holes up to 130mm diameter (dependent on material and type of cutter). The 4 geared speeds will provide optimum cutting surface speeds for most types of material and cutter sizes, while the automatic oilfeed ensures effective lubrication during drilling. The new solid state control panel provides positive and reliable switching.
